Press Release-For Immediate Release

A.L.P. Introduces the Sentry® Barricade™ Lens for Outstanding Vaportight Performance

August 31, 2021 (Niles, IL) A.L.P. Lighting Components is pleased to announce the introduction of Sentry® Barricade™, a new 4-ft injection-molded low-profile lens. It is the newest addition to A.L.P.'s line of rugged lenses for the flagship Sentry® Series enclosed and gasketed fixture kits. Featuring a contemporary look and outstanding performance, the new lens modernizes the Sentry Series line while maintaining the existing benefits of robust construction and a large compartment size.

Designed by the injection molding experts from A.L.P. LexaLite®, Sentry Barricade's molded-in texture offers superior lamp hiding. In addition, a new gasket compression rib results in superior sealing for extreme environments.

The Sentry Barricade lens is available in clear acrylic, Lumieo® (frosted acrylic), and clear polycarbonate. Regardless of the light source, the clear and Lumieo options provide visual comfort while maintaining high efficacy. The clear polycarbonate version will stand up to applications requiring impact resistance and is a more economical choice than A.L.P.'s current thermoformed offering.

Suspended vaportight Sentry enclosures are suitable for wet, damp, dusty, and cold applications such as parking garages, car washes, industrial buildings, and horticultural spaces. Samples are available now.

A.L.P. is a leading global supplier of lighting components, offering a diverse line of products and services for lighting OEMs and the aftermarket. From LED to legacy applications, A.L.P. offers the industry's most comprehensive line of LED fixture kits, vapor-proof enclosures, unwired fixture bodies, louvers, and reflectors. A.L.P. Brands include Steel Craft, LexaLite®, and Reflek®. For more information, contact Lisa Yeadon, Director of Marketing Communications, at (773) 550-4605 or email to: lisayeadon@alplighting.com
