

## HiLumz and SnapCount Announce Partnership for Integration into SnapSource Product Hub

- [June 10, 2021](#)

**Naperville, IL:** SnapCount and HiLumz have announced a partnership to feature the HiLumz product catalog in the SnapSource™ Product Hub. With the partnership, HiLumz lighting products are now fully integrated into the Product Hub, providing hundreds of lighting retrofit contractors and ESCO's with direct access to updated, accurate lighting products. Through the use of SnapSource, users of SnapCount receive lighting product data straight from the manufacturer, enabling manufacturers such as HiLumz to gain product usage trends and enhance product exposure.

Represented by an industry-leading network of ESCO's and retrofitters, the SnapSource Product Hub provides lighting manufacturers with the ability to upload product data into a central repository for instant use in project quotations in SnapCount. SnapCount users can then utilize the Product Hub to search, price, quote and order the up-to-date lighting products from their preferred distributors for installation.

SnapCount user Mike Hunter of National Electrical Contracting firm Rogers Electric stated "HiLumz offers a wide range of retrofit and fixture products with varying lumen output and color temperature to allow you to really dial into a customer's needs. They also build fixtures and kits with simple installations that drastically reduces the minutes per fixture required compared to other manufacturers. They will even custom design a retrofit kit to oddball fixtures that you may run across and no other kit is available. We're excited to have instant access to an up-to-date catalog of HiLumz products directly in the SnapCount platform through the SnapSource Product Hub."

Of the partnership with HiLumz, StreamLinx COO Jeff Seifert stated, "HiLumz offers a full line of innovative commercial lighting products that are high efficacy, easy to install and they are nimble enough to provide custom design options to contractors. They are an emerging favorite with the retrofit community".

HiLumz President, Marc Noland, expressed his enthusiasm for the partnership, "HiLumz makes the highest quality LED systems on the market with JIT production, allowing for huge product variety and quick service. Our customers are professional installers looking for long term, stable, and serviceable OEM quality solutions. We're fortunate to have a technology platform/partner like SnapCount that can handle the complexity of our line and a customer base that embraces the technology that connects us. Great work to the HiLumz and SnapCount team in getting this launched!"
