

SnapCount Announces Partnership with Litetronics for Integration into Snapsource Product Hub

- July 15, 2021

Naperville, IL: SnapCount has announced a partnership with Litetronics to feature their lighting product catalog in the SnapSource™ Product Hub. As a SnapSource partner, the Litetronics line of lighting products are now fully integrated into the SnapSource Product Hub, enabling hundreds of retrofit contractors and ESCO's to access up-to-date lighting product information. With the partnership, Litetronics receives product usage trends and enhanced exposure to the SnapCount user base. Providing lighting manufacturers with the ability to load lighting product data into a central repository, the SnapSource Product Hub enables the industry leading network of ESCO's and retrofitters to access accurate product data for instant use in project quotations. Through utilization of the Product Hub, SnapCount users are able to search, price, quote and ultimately order lighting products from their preferred distributors for installation at the project site.

SnapCount user Lynn Hawkins of Sustainable Turnkey Solutions stated "Litetronics is a valued partner of STS. The quality of their lighting fixtures are at a top level and their support after the sale is exceptional. Bob Sorensen, the owner of Litetronics, will pick up the phone on any questions and work with our team to develop non-standard fixtures and controls depending on the customer and application. We love this flexibility as it sets us apart in our market. Because they have been in business since 1970 they have been able to support trends and build products that continue to get better and better. This is why we feel that they will be able to support us in all phases of our business."

Of the partnership with Litetronics, StreamLinx COO Jeff Seifert stated, "Litetronics is well regarded in the retrofit community by ESCO's and contractors who understand the inner game of lighting and have a sharp eye for value on behalf of their facility customers. Their LED retrofits, luminaires, and lighting fixtures are easy to install and offer superb performance and efficiency. We are thrilled to have them as part of the SnapSource Product Hub."

Litetronics CEO, Robert Sorensen, expressed his enthusiasm for the partnership, "The SnapSource team has created a great product and a great opportunity for us to connect with new people. We've always had a focus on making things easy for our customers, so we feel that SnapCount's streamlined quoting process is a perfect match for Litetronics."
